

How to identify signs of vision loss in kids

Treating vision problems early can help protect your child's sight. If you have concerns about your child's vision or your child has failed a vision screening, talk with your pediatrician or schedule an appointment with an eye care specialist. Children experiencing vision loss may display these warning signs.

1

Close or cover one eye

2

Squint the eyes

3

Complain of blurriness or difficulty seeing

4

Hold books/iPad close or move closer to the TV

Misalignment of the eyes

5

Shaking of the eyes

6

Headaches

7
